

# <O. WINSLOW EDWARDS>

Experienced in both full-stack software development and public health, combines technical proficiency with research project management and consulting skills. Seeking remote or hybrid Software Engineer I roles to leverage engineering skills and prior experience working in a leadership role to drive success of dynamic cross-functional teams. Intrigued by software that supports health, joy, and well-being.

## PROFESSIONAL EXPERIENCE

---

### Software Development Intern | Home Chef, Remote | Jan 2024 - Present

Gained hands-on experience with Ruby, RSpec, Rails, React, and PostgreSQL. Iteratively writing code and unit tests for Netsuite integrations, user ability modifications, code refactoring, debugging, data validation, and UX improvements. Worked on features to help align site with regional and national data privacy regulations. Actively engaged in the full ticket lifecycle, including refinement and PR review.

### Full-stack Coding Student | Ada Developers Academy, Atlanta, GA | Mar 2023 - Aug 2023

Accepted to a highly competitive full-time program that provided an intensive introduction to Python, Pytest, Flask, PostgreSQL, Javascript, React.js, HTML and CSS over 6 months. Completed 14+ projects including a capstone (below) and a team-based mushroom-themed inspiration board where users could perform CRUD functions, like and sort digital post-its. Gave a lightning talk introducing Docker.

### Public Health Program Associate

Emory University, Atlanta, GA

Jan 2021 - Feb 2023

Managed multiple research projects, demonstrating proficiency coordinating cross-functional teams. Led multiple weekly sync-ups, tracked deliverables, programmed survey tools. Orchestrated 4 regional and national advertising campaigns via Meta, Grindr, and Snapchat, including budget management, performance monitoring and graphic design of creative, ultimately recruiting 18,000+ participants.

## TECHNICAL DEMO

---

### Provide | Capstone Paired Project

- Created a website where LGBTQ2S+ people can review and locate affirming healthcare in their area
- Made a RESTful backend with Flask and PostgreSQL
- Used Vue.js and CSS to craft intuitive frontend experiences allowing users to register, add new providers, create, react to, and read reviews
- Offered a survey of user's experience with a provider

## LANGUAGES

---

- US English (Native)
- LATAM Spanish (Intermediate)

## SKILLS & PROFICIENCIES

---

- JS, Vue.js, React.js, Ruby, RSpec, Rails, HTML, CSS, Python, Pytest, Flask, PostgreSQL, Postman
- Microsoft Office, Canva, Stata

## EDUCATION

---

### Master of Public Health - 2020

Simon Fraser University  
Burnaby, BC, Canada

### Bachelor of Arts in Biology - 2014

Swarthmore College  
Swarthmore, PA, United States
