Experienced in both full-stack software development and public health, combines technical proficiency with project management and consulting skills. Seeking Junior Developer or Software Developer I roles to leverage engineering skills as well as prior experience working in a leadership role to drive success of dynamic cross-functional teams.

TECHNICAL EXPERIENCE

Software Development Intern

Home Chef, Remote

Jan 2024 - Present

Gained hands-on experience with Ruby, Ruby on Rails, React, and PostgreSQL. Iteratively writing code and unit tests for Netsuite integrations, user ability modifications, code refactoring, debugging, data validation, and UX improvements. Worked on features to help align site with data privacy regulations, including specific state privacy requirements. Actively engaged in the full ticket lifecycle, from creation to refinement, PR review, and completion. Practiced Agile methodologies and demonstrated effective collaboration, with a knack for identifying creative solutions and time management.

TECHNICAL DEMO

Provide | Academic Paired Project

- Created a website where LGBTQ+ people can review and locate affirming healthcare in their area
- Made a RESTful backend with Flask and PostgreSQL
- Used Vue.js and CSS to build intuitive frontend experiences allowing for users to register accounts, add new providers and create and read reviews

PROFESSIONAL EXPERIENCE

Public Health Program Associate

Emory University, Atlanta, GA

Jan 2021 - Feb 2023

Managed multiple research projects, demonstrating proficiency in the coordination of cross-functional teams. Led multiple weekly stand-ups, tracked deliverables, programmed survey tools (3+) and large-scale participant recruitment (10,000+ annually). Orchestrated 4 multi-state and regional advertising campaigns via Meta and other social media platforms, including budget management and graphic design of still and video ad creative.
